SUPERCARGE PREVENTION WITH ARTIFICIAL INTELLIGENCE

**hypertrain.safety** is a modern, Incident Management platform that uses Artificial Intelligence to support Safety Managers investigate, and prevent workplace incidents. It's easy to use interface allows for streamlined reporting, analysis and transparency. As a cloud product rooted in Artificial Intelligence, is a robust and scalable upgrade for any safety management system.

## Report

Seemlessly allow your employees to report incidents, near misses and hazards by simply scanning a QR code (no login required). A healthy reporting culture is the bedrock of a safe workplace

## Analyze

Quickly identify similar historic incidents, near misses or reported hazards. Record witness statements, documents and root causes. Track injuries and lost time. Plan investigations and automatically summarize investigation activities.

## Prevent

Create mitigation and prevention actions. Assign responsibilities and due dates. Not sure where to start? Use hypertrain.Intelligence to search the web for similar incidents and see what others have done in similar situations.

## Share

Use **hypertrain.intelligence** to automatically sanitize and compile your incident record into Lessons Learned in email format. Send these Lessons Learned to Safety Managers, Executives and other stakeholders in your organization.

## hypertrain.intelligence

- **Semantic Similarity:** The platform automatically performs background searches for similar events including incidents, near misses and reported hazards across multiple languages and locations
- **Contextual Web Searches:** Don't know where to start with investigations or preventive actions? The platform will search the web for similar incident reports and return relevant, contextual results, including links to the sources.
- **Summarization:** Natural Language Processing is a mature form of AI that can summarize your incident report into a Lesson Learned, while sanitizing the output for privacy protection.
- **Auto-Triage:** If enabled, safety managers can train the platform to automatically classify reported hazards into Low, Medium or High severity. Managers are notified of Medium or High severity hazard reports, while Low severity hazards are compiled into a weekly digest.

## key features

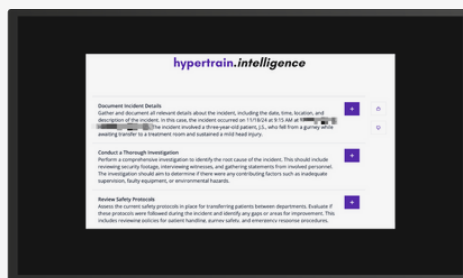

### QR Codes

Post QR codes on notice boards or poster to allow employees and visitors to report incidents, near misses and hazards. QR codes can also be used to access location specific SDSs.

### Contextual Web Search

Contextual web search puts global knowledge at your fingertips by searching for investigation practices and prevention methods for similar events. Information returned will be complete with citations of sources for full transparency and to assist with further research. Only sanitized data is used as search parameters and customers have the ability to audit the search history for privacy protection.

### Lessons Learned

Incident reports can be automatically summarized and sanitized into Lessons Learned that can be sent to non-users via email. The Lessons Learned database can also be searched manually.

AI POWERED SAFETY SOLUTIONS

## ai Incident Reporting

Safety is the cornerstone of any thriving workplace, and the right tools can make all the difference in fostering a secure, proactive environment. Our innovative incident reporting solution revolutionizes how organizations handle safety incidents, ensuring not only swift resolution but also long-term prevention. With powerful AI capabilities and user-friendly features, this solution empowers every employee while providing leadership with the insights they need to drive meaningful change.

## ai Near Miss Reporting

In the journey toward creating a safer workplace, identifying and addressing near misses is just as important as responding to incidents. Near misses offer invaluable opportunities to prevent accidents before they occur. Our advanced near miss reporting solution empowers organizations to transform these close calls into actionable insights that enhance safety culture, protect employees, and demonstrate leadership's commitment to well-being. Combining user-friendly technology with AI-driven insights, this solution takes safety to the next level.

## ai Hazard Reporting

Hazards are precursors to incidents and injuries, and addressing them before they escalate is the cornerstone of proactive safety management. Our advanced hazard reporting solution empowers organizations to identify and mitigate risks quickly and effectively. Designed with simplicity, inclusivity, and cutting-edge AI, this tool ensures a safer environment for employees, visitors, and surrounding communities. By prioritizing high-risk hazards and delivering actionable insights, it transforms the way organizations manage safety.

## ai Safety Data Sheet (SDS) Library

Managing chemical safety is a critical responsibility for organizations that handle hazardous substances. Providing quick, easy access to Safety Data Sheets (SDS) ensures that everyone—employees, visitors, and even the public—has the information they need to handle chemicals safely and respond effectively to potential incidents. Our SDS Library solution is designed to streamline this process, combining user-friendly access with robust management and tracking features to transform chemical safety management.

## ai Custom Applications

Don't see what you need here? Our flexible platform allows us to create custom applications for customers of all sizes and industries within weeks not months. Our development and data science teams are ready to assist you in your application journey and to advise you on how best to implement Machine Learning and Artificial Intelligence in your applications and processes. Got an idea for an application? Contact us to discuss your idea today.

CONFERENCE PRICING

## hypertrain.safety

### Professional

- Incident Reporting
- Near Miss Reporting
- Hazard Reporting
- SDS Library
- Hypertrain.Intelligence
- 2 Safety Manager Licenses
- 2 Approver Licenses
- 5 Tasking Licenses
- Additional Licenses Available
- One time setup: \$15,995

## CAD 15,995

per year  
3-year contract

Hypertrain.Safety is a total game-changer for safety management. Its easy-to-use, visually stunning interface and simple, all-access licensing make it super accessible for everyone on the team.
